

DDDO Audit

To help you understand what sort of technologies and activities can be used to support learning in designing and developing digital outcomes, complete the table below. Reflect on what sort of technologies your learners use currently and identify potential opportunities for their use in your teaching or your area/school. You can complete this audit individually or with a colleague.

Technology or process used to create digital outcomes	Where is this being used? (Learning area and curriculum level)	Suggest other possible uses (Learning area and curriculum level)
Digital camera/ creating digital still images		
Digital sound recording		
presentations, word processing, spreadsheets		
Creating a website		
Computer programming		

Digital animation		
Making/editing digital videos		
3D printing		
Single board computer (BBC micro bit, raspberry pi, arduino, and so on)		
Making custom electronics		
Creating/mixing digital sound/music		
Creating databases		
Robotics		
Computer numerical control (CNC) cutting of hard materials
